3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, cash at banks and short-term, highly liquid investments with an original maturity of not more than three months that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

3.2 Inventories

Inventories are measured at their historical costs. The cost of inventories comprises costs of purchase, costs of conversion (including raw materials, direct labor cost, other directly related cost, manufacturing general overheads allocated based on the normal operating capacity) incurred in bringing the inventories to their present location and condition.

In case the net realizable value is lower than the original price, it must be calculated according to the net realizable value.

Net realisable value ("NRV") represents the estimated selling price in the ordinary course of business less the estimated costs to complete and the estimated costs necessary to make the sale.

The perpetual method is used to record inventories, which are valued as follows:

Raw materials, tools and supplies and goods for resale	- cost of purchase on a weighted average basis.
	- cost of purchase at Codupha Central Pharmaceutical Joint Stock Company – a subsidiary of the Corporation on a specific identification basis.
Finished goods and work-in-process	- cost of direct materials and labour plus attributable manufacturing overheads based on the normal operating capacity on a weighted average basis.

A lease is classified as a finance lease whenever the terms of the lease transfer substantially all the risks and rewards of ownership of the asset to the lessee. All other leases are classified as operating leases.

Where the Corporation and its subsidiaries are the lessee

Rentals under operating leases are charged to the consolidated income statement on a straight-line basis over the lease term.

In accordance with Circular 45/2013/TT-BTC dated 25 April 2013, such prepayments for land rental are recognised as long-term prepaid expenses and amortised over the remaining lease period.

3.11 *Business combinations and goodwill*

Business combinations are accounted for using the purchase method. The cost of a business combination is measured as the fair value of assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange plus any costs directly attributable to the business combination. Identifiable assets and liabilities and contingent liabilities assumed in a business combination are measured initially at fair values at the date of business combination.

Goodwill acquired in a business combination is initially measured at cost, being the excess of the cost the business combination over the acquirer's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. If the cost of a business combination is less than the fair value of the net assets of the subsidiaries acquired, the difference is recognized directly in the consolidated income statement. After initial recognition, goodwill is measured at cost less any accumulated amortization. Goodwill is amortized in an estimated period of ten (10) years on a straight-line basis. The Corporation conducts the periodical review for impairment of goodwill of investment in subsidiaries. If there are indicators of impairment loss incurred is higher than the yearly allocated amount of goodwill on the straight-line basis, the higher amount will be recorded in the consolidated income statement.

3.12 *Investments*

Under the equity method, the investment is carried in the consolidated balance sheet at cost plus post acquisition changes in the Corporation's share of net assets of the associates. Funds shared from associates are recognised accordingly in equity of the Corporation. Goodwill arising on acquisition of the associate is included in the carrying amount of the investment. Goodwill is not amortised and subject to annual review for impairment. The consolidated income statement reflects the share of the post-acquisition results of operations of the associates.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.12 Investments (continued)

Investments in associates (continued)

The share of post-acquisition profit/(loss) of the associates is presented on face of the consolidated income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividend/profit sharing receivable from associates reduces the carrying amount of the investment. In addition, for the dividends/profits shared from undistributed earnings of associates arising before the date that the Corporation was transformed to the joint stock company, the Corporation recognises an increase in asset revaluation reserve (Note 3.13) and a decrease in undistributed earnings on the consolidated balance sheet.

The financial statements of the associates are prepared for the same reporting period and use the same accounting policies as the Corporation. Where necessary, adjustments are made to bring the accounting policies in line with those of the Corporation.

Investments in other entities

Investments in other entities are stated at their original costs according to the revaluated value at the time when the Corporation and its subsidiaries were officially transformed into joint stock companies. Distributions from accumulated net profits of the associates arising subsequent to the date of significant influence or the date that the Corporation and its subsidiaries were transformed to a joint stock company are recognised in the consolidated income statement. Dividends or profit shared from accumulated profits of other entities arising before the date that the Corporation and its subsidiaries were transformed to a joint stock company are deducted to the cost of the investment.

Provision for diminution in investments

Provision for diminution in value of investments is made when there are reliable evidences of the diminution in value of those investments at the balance sheet date.

Increases or decreases to the provision balance are recorded as finance expense in the consolidated income statement.

Held-to-maturity investments

Held-to-maturity investments are stated at their original costs. After initial recognition, held-to-maturity investments are measured at recoverable amount. Any impairment loss incurred is recognised as finance expense in the consolidated income statement and deducted against the value of such investments.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

Previously unrecognised deferred tax assets are re-assessed at each consolidated balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred tax is charged or credited to the consolidated income statement, except when it relates to items recognised directly to equity, in which case the deferred tax is also dealt with in the equity account.
